

Megadoor – robust doors for the Steel and Foundry industries

Stainless steel production

Stainless steel production

Steel profile production

Foundry, pump production
(heat resistant fabric)

Megadoors for the Steel and Foundry industries

Doors used in the steel and foundry industries are exposed to dirt, heat, moisture etc. Vehicles and material are passing the door many times a day and any waiting for the door to open or due to a non-reliable door operation costs money.

Megadoors have been installed at plants throughout Europe and have proven extremely successful thanks to the extraordinary durability and reliability.

Steel plate production

Wide range steel products

SOME BENEFITS:

- *Fast opening*
- *Strong components*
- *High corrosion resistance*
- *Resistant to high winds*
- *Reliable in operation*
- *Minimal maintenance required*
- *Remote operation possible*
- *High safety level*
